Abstract (Basic): DE 3912477 A

Compsn. for external application contains 2-dimethylaminoethanol (I) plus usual formulation materials. (I) is used as a salt or ester, esp. the hydrogencarbonate, citrate, orotate, hydrogentartrate, aceglutamate, acetamidobenzoate or hydrogensuccinate.

USE/ADVANTAGE - The compsns. improve the condition (elasticity and structure) of the skin, preventing premature ageing and development of wrinkles. They also reduce androgen-dependent hair loss and stimulate hair growth. (I) increases protein synthesis and prolongs the lifetime of (post)mitotic fibroblasts. (I) is already known for internal use as a psychopharmaceutical and for treatment of geriatric disorders. (3pp Dwg.No.0/0)
